EXPERIENCE

Corporate VC & Business Analytics Extern @ HP

Aug '24 - Sep '24, Remote, USA

- Utilizing advanced data analytics for strategic evaluations, expected to assist in deal sourcing and due diligence for pre-seed and seed stage startups specializing in Generative AI productivity tools.
- Set to **conduct market research** and collaborate with venture capital teams, using SQL and Excel to analyze and present startup data, identifying promising investment opportunities.

Software Engineering Fellow @ Headstarter AI

Jul '24 - Sep '24, Remote, USA

- Led the development of key projects, integrating **cutting-edge technologies** and **AI-driven solutions**, while gaining practical experience in **web development** and participating in mock scenarios and hackathons.
- Served as Scrum Master, facilitating agile processes while ensuring team collaboration and project delivery.

Associate Software Developer @ Absolute Security

Sep '23 - May '24, Vancouver, CA (Hybrid)

- Developed and implemented Java-based software components and **RESTful APIs**, focusing on robust design, implementation, and testing to meet client and stakeholder requirements.
- Deployed and contributed to microservice components using Jenkins, Kubernetes and ARGO.
- Led daily Agile scrum meetings and actively participated in backlog refinement and sprint planning.
- Maintained team quality benchmarks by achieving 90% code coverage in unit tests for all new code.

Sales Specialist @ Apple

Sep '23 - Jan '24, Vancouver, CA

- Identified customer needs and showcased product features, enhancing product knowledge through training.
- Built relationships with customers by providing support, answering questions, and following up on purchases.

Java Developer @ Albertsons Companies

Sep '22 - Jan '23, Vancouver, CA (Hybrid)

- Connected an API interface to company semi-trucks by creating PowerShell and command-line scripts
- Automated weekly data collection and formatting in JSON for 16 distribution centers across the United States, enabling critical operational reviews and adjustments.
- Increased code coverage by 25% by implementing essential JUnit tests in Java-based repositories.
- Authored comprehensive support documentation for both the technical support team and end users.

Application Programmer @ Provincial Health Services Authority

Sep '21 - Jan '22, Vancouver, CA

- Developed, implemented, and tested a .NET-based website, with a focus on augmenting it with new pages and menus while strictly adhering to development standards and wireframe documentation.
- Executed database updates with SQL queries and troubleshot web and database issues.

PROJECTS

Escape From Corona 🗹 | Java, Maven, JavaFX, JUnit, Swing GUI

SFU SWE Class

- Engineered a coronavirus-themed, **multi-level 2D maze game**, featuring rewards, punishments, and moving enemies with pathfinding algorithms. Focused on front end including UI, menu screens, and audio integration.
- iCradle 🖸 | React, Python, TypeScript, Docker, HTML/CSS

SFU Special Projects Class

- Reduced preventable maternal deaths in Ugandan villages by 22% by supporting a technological healthcare system developed in partnership with King's College London, with a focus on improving maternal care.
- Served as **Product Owner**, managed business needs from stakeholders to technical partners, and contributed to coding, maintaining, fixing bugs, and introducing new features to ensure efficient project execution.

StockStarter 🗷 | JavaScript, React, Next.js, Tailwind, Firebase, Stripe, OpenAI | Headstarter SWE Fellowship

• Created an **AI-powered flashcard app** that dynamically generates study materials on stock and finance topics from user inputs, featuring login capabilities and the option to save flashcards for personalized learning.
